DIRECTIONS FOR USE

When to use each part

Part 1. Classified Catalog. Use as a guide in book selection. For this purpose the books listed are arranged by Dewey Decimal Classification numbers. Necessary information about publisher and price, and annotations are given in this section.

Use also as a cataloging tool, since the subject headings for each book are indicated in this section.

For explanation about classification, see note in the Preface.

A brief outline of the Dewey Decimal Classification appears at the beginning of Part 1 to assist in the use of the Classified section.

Part 2. Alphabetical Index. Use as an index to Part 1 because it indexes in one alphabet author, title, and subject entries for all books included, and also analytical entries under author, title or subject for parts of books.

Part 3. Publishers Directory. Use to locate full names and addresses of publishers of books listed in the Catalog.

Key to Symbols

PREFACE

The STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES is a selected, classified catalog of books which have been found useful in senior and junior high school libraries.

History. The First Edition of the CATALOG in 1926-1928 was edited by Zaidee Brown. The Second Edition appeared in 1932 and there have been revised editions every five years since, thus making this the Eighth Edition. At this point it would seem fitting to pay tribute to the able and devoted editors and assistant editors of past years who have made the CATALOG what it is today. In approximately chronological order: Zaidee Brown, Minnie Earl Sears, Dorothy E. Cook, Polly Fenton, Eva Rahbek-Smith, Isabel S. Monro, Helen Grant Cushing, Iris Almy, Phyllis Crawford Scott, Agnes Cowing, Ruth Reisig Jervis, Anne T. Eaton, Dorothy Herbert West, Margaret B. Dirk, Lucile P. Bruton, Dorothy M. Peake, Marion L. McConnell, and Rachel Shor.

Consultants and standards of selection. Ever since its beginning in 1926 the objective of the STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES has been to provide a list of books, both fiction and non-fiction, whose usefulness in senior and junior high schools is vouched for by a representative group of experienced librarians and specialists in literature for young people. To achieve this objective, consultants are chosen with the assistance and advice of the American Association of School Librarians (a division of the American Library Association), which is asked to nominate librarians and specialists of the highest professional standing, representing the needs and interests of high school libraries of various types and sizes in all parts of the country. A list of the consultants who participated in the making of the present edition will be found at the end of this Preface. In many, perhaps most, cases the vote of a consultant represents the composite judgment of a number of staff members or colleagues, thus widening the base of experience even further.

All inclusions in the CATALOG are determined by the votes of the consultants; none by the publisher or editorial staff. In making the selections for the present volume the consultants were asked to cast their votes carefully and objectively, in accordance with the guiding principles of book selection adopted by the American Library Association and its component divisions, with emphasis on the usefulness (or otherwise) of each book in their own libraries or systems; in fact, they were instructed not to vote on books not actually known and used. Hence the books entered in the CATALOG may be said to be of tested usefulness. The consultants were also asked to make the CATALOG as up-to-date as possible, without sacrificing older books of enduring value, and to keep the needs of smaller libraries especially in mind.

In the making of the present volume the consultants also participated importantly in a number of basic policy decisions, which will be discussed in the following paragraphs.

The Eighth Edition. The present Eighth Edition includes entries for 4,212 fully entered titles—as compared with 3,585 fully entered titles in the Seventh Edition. This increase was largely made possible by elimination of the previously "noted" titles at the ends of classes, because the consultants felt they were often lost and also of limited usefulness. In addition the consultants advised us to eliminate the list of analytics in Part 1 thus providing space for some additional titles (it should be noted that these books are analyzed as previously in Part 2 of the CATALOG.) The number of books entered, starred, and analyzed in this Edition are as follows:

Books entered	4,212
Books single-starred	1,019
Books double-starred	463
Number of analytical entries	12,850

Another major change in the present Edition, also strongly endorsed by the consultants, is the cataloging of all titles under the author's name *as it appears on the title page,* with reference from other name forms, if known. This "reform" was first instituted in the 1961 Supplement to the Seventh Edition and, to judge by comments and correspondence, has met with the overwhelming approval of the CATALOG's users. To be sure, application of the new rules has produced a few oddities. For example, some editions of *The Adventures of Huckleberry Finn* are published as by Mark Twain and some as by Samuel Clemens. However, these instances are few, and *see also* references have been provided at the appropriate points so that no user will be seriously inconvenienced.

Pamphlets are generally short lived. Frequently they are no longer available by the time they can be listed in a catalog which appears only once a year. Moreover, VERTICAL FILE INDEX is readily available to all libraries. Therefore, the consultants decided to drop pamphlets entirely from the High School Catalog, except for bibliographic aids, but asked that the publishers of the CATALOG consider including a list of pamphlets and paper back series which the consultants have found most useful. This list appears at the beginning of Part 3 of this Edition.

Since this Edition is expected to last for five years and since catalog cards prepared by The H. W. Wilson Company cannot be kept in stock when sales diminish, the inclusion of symbols to indicate the availability of cards for books listed in this Edition could be misleading. Therefore, the (W) symbols have been omitted from the CATALOG since the authoritative source for ordering catalog cards is the latest cumulated Checklist of Catalog Cards and its Supplements.

Voting. The final choice of the books included in this Eighth Edition is the result of careful voting by the consultants on: (1) titles which appeared in the Seventh Edition (1957); (2) titles which appeared in the Supplements from 1958 to 1961; (3) lists of several hundred new books; (4) titles suggested by publishers, subscribers, and the consultants themselves; (5) titles taken from standard reading lists in the field. These were consolidated into a single voting list, arranged in classified order like the CATALOG itself, so that the consultants could consider all books in a given subject group at the same time. At the request of the consultants, no out-of-print titles were included on the voting list, thus increasing the number of actually available titles which could be elected. However, any titles now o.p. which are subsequently brought back into print by their publishers will, of course, be considered for inclusion in future Supplements.

Because considerations of size and cost of the CATALOG inevitably limited the number of books which could be included, the non-inclusion of any book should not be construed as a reflection on the title in question. Furthermore, since the CATALOG serves many thousands of very small schools and libraries which have few other book selection resources and often extremely limited budgets, and since it is essential to keep the CATALOG within the price reach of these small libraries, it is realized that larger libraries with better staffs and facilities may need to supplement the titles in the present CATALOG through their own efforts.

Purpose and Use. It is hoped that this Edition, like its predecessors, will serve several purposes: (1) As an aid in purchasing. For this purpose full information is given about publishers, prices, and edition. (2) As a cataloging aid. (3) As a reference aid, both through the annotations in Part 1 and the subject and analytical approach in Part 2. (4) As an aid in rebinding, discarding, and replacing: problems which face every library regardless of size. (5) As an aid in library schools and training courses which deal in book selection.

It should be emphasized at all times that the CATALOG is intended as an aid toward, not a substitute for, good book selection, which should always be responsive to the special needs and interests of the particular school or library or community. (For example: The book collection in a vocational high school would differ considerably from that in a college preparatory school and vice versa.)

Arrangement. The CATALOG is divided into three parts. Part 1 is a Classified Catalog, arranged according to the latest Abridged Edition of the *Dewey Decimal Classification*. In this part complete bibliographical information is given for all books. Suggested subject headings are given, based on the latest edition of *Sears List of Subject Headings*. An annotation showing the content and scope of the book is provided, frequently including an evaluative quotation from one of the established reviewing media. Part 2 is an Author, Title, Subject, and Analytical Index in one alphabet. This serves as a key to the contents of Part 1. Part 3 is a Directory of Publishers, giving full name and address of each as an aid in ordering.

Starred Titles. Those books which are especially recommended by the consultants, as indicated by their votes, are marked with a star (asterisk). Those which are most highly recommended (i.e., which received the highest votes) are indicated by a double star. This starring does not mean that if a library purchased all of the starred titles in the CATALOG it would necessarily have a well-rounded collection. It does mean that these particular titles have been found especially useful by the consultants, as indicated by their votes.

Prices and Editions. Information about prices and editions has been obtained directly from the publishers. The information is as up-to-date as possible, but since prices are always subject to change, care should be taken to verify them when placing orders, especially as the CATALOG grows older.

Analytical Entries for Parts of Books. As in former Editions, subject entries have been made in Part 2 for parts of books when these sections have not been brought out by the general subject assigned to the whole book. Author and title analytics have been made for all short stories and plays in collections.

Directions for Use. Before using the CATALOG, all subscribers are urged to read carefully the section "How to Use the STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES" which will be found immediately following this Preface. A shorter "Directions for Use," including the "Key to Symbols," will be found on the front fly-leaf for quick reference.

Acknowledgments. The cooperation of publishers who have generously supplied copies of the books included in the CATALOG and who have provided information concerning prices and editions is gratefully acknowledged. The editors also extend thanks to Loretta Devine, and other staff members who performed exceptional service in the preparation of this Edition.

The publisher and editors are especially happy to acknowledge their indebtedness to the following consultants who participated in the selection of titles and the determination of basic policies for the present CATALOG:

Mae Arlander, Librarian, Marshall High School Library, Minneapolis, Minn.; Mrs. Muriel F. Boardman, Librarian, Elmhurst Junior High School, Oakland, Calif.; Ruth Ersted, State Supervisor of School Libraries, Minnesota Department of Education, St. Paul, Minn.; Mrs. Margaret Farley, Librarian, Junius H. Rose High School, Greenville, N.C.; Lois Fetterman, Supervisor, Order Department Library Section, Los Angeles City Schools Libraries, Los Angeles, Calif.; Clara C. Whyte, Supervisor of Library Services, School Board of the City of Norfolk, Norfolk, Va ; Ethel M. Wood, Librarian, Jefferson Junior High School, Oak Ridge, Tenn.

HOW TO USE THE STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES

The STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES is arranged in three parts: Part 1. Classified Catalog; Part 2. Author, Title, Subject, and Analytical Index; Part 3. Directory of Publishers.

USES OF THE CATALOG

The STANDARD CATALOG FOR HIGH SCHOOL LIBRARIES is designed to serve several purposes as follows:

As an aid in purchasing. The CATALOG is designed to assist in the selection and ordering of titles. Annotations are provided for each title listed and information is given concerning publisher and price as well as varying editions. Since Part 1 is arranged by the Dewey Decimal Classification the CATALOG may be used as a checklist to determine those parts of the library collection which are weak and require additional material. The fact that the books listed have been found useful in various types of libraries throughout the country would indicate that they may also be useful in many other libraries. However, no library should depend upon this one aid in book selection, but should take into account particular local needs, any special curriculum requirements, and the nature of the school or community.

As a cataloging aid. For this purpose full bibliographical information is provided in Part 1. This includes recommended subject headings based upon the latest edition of *Sears List of Subject Headings* and a suggested classification based upon the latest Abridged Edition of the *Dewey Decimal Classification.*

As a reference aid. This is made possible both through the annotations in Part 1 and by the subject and analytical approach in Part 2.

As an aid in rebinding, discarding, and replacing. It is possible to see what other titles on a subject are available, a factor which often influences the decision whether to discard or rebind or replace a book.

As an aid in library schools. The CATALOG is of use in courses which deal with book selection, particularly on the junior and senior high school levels.

Part 1. Classified Catalog

The Classified Catalog is arranged with the non-fiction books first, classified by the Dewey Decimal Classification in numerical order from 000 to 999. The fiction books follow and are designated by the symbol "Fic". These are in turn followed by the short story collections denoted by the symbol "S C".

Each book is listed under one main entry where full information is given. Usually this is the author, although it may occasionally be the editor or even a title entry. The following main entry is typical:

Lord, Walter
‡ The good years; from 1900 to the first
s World War. Harper 1960 369p illus 32
plates maps $4.95 **973.9**
1 U.S.—Civilization 2 U.S.—History—1898-
In this account of the United States from 1900-1914, the author concentrates on such major episodes as "the American beseiged along with other nationals in the Boxer rebellion; McKinley's assassination; railroad speculation; the Wrights' new flying machine; the San Francisco earthquake-fire; union troubles; the bank panic of 1907; Peary's expedition to the North Pole; the woman suffrage movement." Pub W
Published material: p348-54

In this entry the name of the author is given in the form in which it appears on the title page of the book. It is inverted and is printed in dark or bold face type.

The first line in the body of the entry gives the title of the book *The good years; from 1900 to the first World War.* The two stars before the title indicate that the consultants who choose the books to be included in the CATALOG have found this book to be particularly useful and so it is most highly recommended by them. About ⅓ of the books in the CATALOG will have either a single star or a double star. A single star indicates that the book is especially recommended by the consultants. It should be noted that purchase of all of the titles starred would not necessarily result in a well-balanced collection. It merely means that the books so designated have been found to be particularly useful in actual library work. The symbol *s* indicates that the book is directed at the senior high school student rather than the junior high student.

The title is followed by the information that the book is published by Harper (reference to Part 3 will show that this is Harper & Brothers, 49 E 33rd St, N.Y. 16). This information, with the price, is useful in ordering books. The date 1960 is the date when this book was published. Further information given here is the fact that it contains 369 pages, illustrations, 32 plates, and maps. It sells for $4.95. However, prices should always be rechecked with the publishers for possible changes.

At the end of the last line in the body of the entry is the figure 973.9 in dark type. This is the classification number according to the latest Abridged Edition of the *Dewey Decimal Classification.* 973.9 is the classification for United States—History—Twentieth Century, 1901- .

The two lines "1 U.S.—Civilization" and "2 U.S.—History—1898-" are the recommended subject headings for this book. All subject headings are based upon the latest edition of *Sears List of Subject Headings.* The classification and subject headings provided are useful in cataloging.

Sometimes the subject or subjects assigned to the entire book will not show that there are portions of the book which deal with more specific subjects. In this case analytics are made. In the entry above there are six sections of the book for which such analytics have been prepared. In Part 2 there will be entries for these portions of the book under the proper subjects (e.g., Child labor—U.S.).

Next there is a note giving a brief description of the book and its contents. The note in this case is taken from the *Publishers' Weekly.* This annotation, as it is called, is useful in evaluating books for book selection. It is also useful in determining which of several books on the same subject are best suited for the individual reader.

The last line "Published material: p348-54" indicates the presence of a bibliography in the book.

If more than one edition of this book were currently available and were elected by the consultants, the various editions would be listed in the order of the preference shown by the consultants' voting. The one found most useful would be listed first followed by the others in descending order.

Part 2. Author, Title, Subject, and Analytical Index

This is an alphabetical index of all the books entered in the CATALOG. Each book is entered under author, title, and subject, and under joint author if any. Also included are the subject and title analytics for the books analyzed. The classification number is the key to the location of the main entry of the book in Part 1. The following are index entries for the book cited above:

Part 3. Directory of Publishers

In the entries for the books the publisher's name is given in abbreviated form. This directory lists the abbreviation and then gives the full name and address of the publisher. This facilitates the ordering of books.

At the beginning of this Part there is a list of pamphlet and paperback series which have been found useful by the consultants in their libraries.

Annotation Sources

A list of the abbreviations used most frequently to indicate the sources of annotations quoted appears inside the back cover.

The following is the Second Summary of the Dewey Decimal Classification, which is reprinted here by special permission of the copyright owner, Forest Press, Inc. The non-fiction titles in Part 1 of this Catalog are arranged according to this outline, which will therefore serve as a table of contents to this portion of the Catalog. Please note, however, that the inclusion of this outline is *not* to be considered as a substitute for consulting the Dewey Decimal Classification itself.

The appropriate grade level is noted for all books except reference books. A list of 155 titles for a secondary school library with group suggestions for basic purchase of twenty five titles. There are three balanced extensions of fifteen titles each. Selections for a junior high school library are given

"It is assumed that mathematics books in a secondary school library will serve three groups: students casually interested in mathematics, who may receive stimulation by semi-recreational reading; students gifted in mathematics, who may wish to go considerably beyond the high school curriculum; and teachers, who may want suggestions for deepening and broadening their understanding. Because of the wide variation of background and ability expected among these readers, there is wide variation in the level of the books on this list." Introduction

First published 1876 anonymously under title: A classification and subject index. The 16th edition, edited at the Library of Congress by Benjamin A. Custer with the advice and help of the library profession, returns to the basic principles which governed editions 1 through 14, while retaining generally approved features of edition 15

Contents: v 1 Tables; v2 Index

"The Decimal Classification divides all knowledge, as represented by books and other materials which are acquired by libraries, into nine main classes numbered by digits 1 to 9. Material too general to belong to any one of these classes, such as newspapers and encyclopedias, falls into a tenth class numbered O which precedes the others." Editor's introduction

"The 16th Edition shall be designed for use in the classification of books and similar materials in general libraries, regardless of size, except (1) those libraries which prefer to use an abridged edition and (2) those libraries with special collections which prefer to use close classification for which extremely detailed expansions are needed. Its structure should be such that it can be applied broadly or in detail, depending upon type and size of library." Foreword

1 Books and reading—Best books 2 Literature—History and criticism

"The writings of about 100 individual authors—in some cases several works of one author are suggested—represent the intellectual development of the West. . . . The selection is admittedly geared to tastes and interests of the English-speaking reader. The 500-1,000 word comments on each work or author [only eight of whom are living] are somewhat written down but are invitingly informal. A compilation of available hardbound and paperbound editions of the works suggested is extremely useful for readers who want to build their own library. There is no index of authors or titles. The book is a good guide for the reader with or without formal education who needs direction in significant reading." Booklist

"Program of library instruction at a hypothetical school with syllabi for five teaching departments & 30 lesson plans." Library J

"It is my hope that having it in print may help other schools achieve their own integrated plans of library instruction in less time and with less wasted effort. It is directed to classroom teachers because it is they who do the important part of the work when and if it is done. Librarians and administrators may plot and plan but until the classroom teachers accept the job and do the work, little happens to benefit the pupils. I offer it to them with the hope that it will be of some help." Preface

Prices vary according to binding and terms of payment

First published 1922, this is one of the standard encyclopedias for children and young people. It is revised at each printing to keep it up to date, to add new articles of current interest and to expand older material where needed

The arrangement is alphabetical by subject. Sometimes closely related topics are treated together in broad general articles. Articles are planned to meet curriculum requirements from elementary grades through high school and to suit reading abilities of boys and girls at the grade levels where the articles will be most used. They offer information on such subjects of personal interest to young people as fishing, pets, photography, etc. as well as topics included in the school curriculum. The set is profusely illustrated with photographs, paintings, drawings, picture diagrams, and a variety of maps. Bibliographies are frequently revised, and are often divided into "Books for younger readers" and "Books for advanced students and teachers"

The "Fact-index" gives exact page references to small topics, gathers material together under broad headings, includes much factual information and indexes pictures. The index is divided in alphabetical sections, each appearing at the end of its appropriate volume

The overall purpose has been to provide an authoritative and comprehensive work of world-wide scope, written and edited with special reference to American needs and interests. There are more than 59,000 articles and 15,500 illustrations. There are many special features of particular value to students including: book-length articles on the major countries; comprehensive state articles; articles on the centuries; digests of literary classics and operas; literary and mythological allusions; the text of historic documents; glossaries of technical terms; pronunciation of difficult words. The traditional emphasis on science and on United States, Canadian, and Latin American history and biography is continued without neglect of other areas of knowledge. Although there are numerous cross references, an alphabetical and topical index brings together related references to a single subject

1 Encyclopedias and dictionaries

Prices vary according to binding and terms of payment. A new low school and library price goes into effect April 1, 1957

First published 1917, this is one of the standard encyclopedias for children and young people. It is revised at each printing (at least twice each year) to keep it up to date, to add new articles, and pertinent illustrations of current interest, and to expand older material where needed. In 1947 the encyclopedia was completely rebuilt with the emphasis upon correlation with school curricula, text adapted to the reading level of anticipated grade use, and an expanded illustrative program. The arrangement is alphabetical by specific subject with many cross references so that no index is needed. Thousands of illustrations amplify the text

The 1962 edition contains more than 22,400 illustrations nearly 6,000 in color, 1,725 maps, and the work of more than 2,500 contributors. Volume 20 is the "Reading and study guide."

"A dramatic retelling of how village children caused the horrifying witchcraft trials of Old Salem, at the end of the 17th century." McClurg. Book News

Jackson, Shirley—*Continued*

"There is good introductory background and though the story's subject is by nature horrifying, the book does not play on the emotions. It ends on the positive note that public reaction to the obviously revengeful motives of some of the witnesses made these the last witchcraft trials in the New World and did much to kill belief in witchcraft generally. This is a well-written book which presents a difficult theme lucidly and without condescension." Horn Bk

Bible. Selections

The Bible designed to be read as living literature; the Old and New Testaments in the King James version. This ed. arranged and ed. by Ernest Sutherland Bates. Simon & Schuster 1936 xxiv, 1239p $7.50 **220.5**

In this arrangement of the Bible as contemporary literature "the text of the King James Version is followed, except in the case of Proverbs, Job, Ecclesiastes, and the Song of Songs, where that of the Revised Version is used; the arrangement of the books is by time and subject matter; prose passages are printed as prose, verse as verse, drama as drama; letters as letters; the spelling and punctuation are modernized; genealogies and repetitions are omitted, as well as the whole of Chronicles, the minor Epistles, and similar unimportant passages throughout." Publisher's note
"With taste, discernment, and a minimum of comment, most of which is informed, and to this reviewer highly interesting, Mr. Bates has elucidated the huge heterogeneous work. Or rather by a sensible rearrangement he has as far as possible allowed it to elucidate itself. Of course in this he is under obligation duly acknowledged to Professor Moulton and other scholars. But he seems to me thoroughly justified in his own effort. . . ." The whole of his undertaking is good." Sat R

"This book grew out of a series of discussions and assembly programs on various forms of religion, and their place in the world, held at a preparatory school in Pennsylvania. . . . It is not intended as a complete survey of all forms of religion, and it is not meant for profound scholars. It is only an introduction to a fascinating subject, a simple account of the origin and history of the most important religions of the world. I have tried to tell something about the men who were responsible for these religions [or paths of thought] and to explain the most significant points of their belief and teaching. It is interesting to compare one religion with others, and to discover their differences and the many points on which they agree." Preface

1 Mythology, Norse

"A retelling of the Norse myths . . . which recreates the spare beauty and simple dignity, the humour and pathos of these stories as they are told in the Eddas. In this version, the terse, dramatic form of the folk tale is used throughout, yet the heightened language in which they are told preserves the remoteness necessary to mythical stories of the gods." Ontario Lib Rev

Contents: World of the gods; In the beginning; Thor gains his hammer; Building of the fortress wall; Thor's unlucky journey; Thor's visit to Hymir; How Odin brought the mead to Asgard; Thor's hammer is stolen; Winning of Gerd; How Fenris Wolf was bound; Thor's combat with Rungnir; Apples of Iduna; Death of Balder; Punishment of Loki; New day; Note on the Norse myths; Pronunciation of proper names

1 Mohammedanism

"Following the pattern of 'One God' [class 264] and 'Their search for God,' [class 290] the author tells in well-written, readable text and excellent photographs the story of Moslem life and worship from the days of Mohammed to modern times. Useful not only from the religious angle but as an aid to understanding the culture of Moslem people." Chicago, Children's Book Center

The story of Islam (Mohammedanism) is a great historical conquest as well as a religion. Mohammedans include among their followers small groups in the British Isles, the Soviet Union, and the United States, as well as the masses of people in the true Mohammedan countries which stretch from Morocco on the African coast through Arabia, Syria, Turkey, and Persia to the north of India

1 Marriage 2 Young women

"This is an excellent book dealing with the differences between the sexes, though it is not a book on sex education. There are clearly stated expositions of emotional and cultural patterns affecting girls and explanations of why girls differ in their approach to many details of living. The thesis of the authors is that courtship, marriage and the starting of a family require constant adjustment to the pressures of changing life situations. Both boys and girls will profit by reading this book." Massachusetts

1 Law as a profession

"After explaining what the law is and what a lawyer does the book gives an informal but detailed discussion of prelaw education, summarizes the courses and methodology taught in law school, and considers the hurdle of bar examinations together with some of the problems commonly encountered in establishing a law practice. It also surveys vocational opportunities existing both in specialized areas of law outside the field of private practice and in related professions." Booklist

"One chapter, describing a typical day in the life of a lawyer and some of the usual problems coming to him, engages the reader as completely as any piece of fiction." Kansas City Star

1 Juvenile delinquency 2 U.S. Federal Bureau of Investigation

Through the eyes of Buck Rollins, a young offender, the reader is shown how the Federal Bureau of Investigation works, particularly in relation to juvenile crime, how it trains its agents, cooperates with state and local police, and how its basic belief is in the honesty and courage of youth. Two chapters cover gangs and rumbles. The stories of some young people in trouble are related with emphasis on preventive measures. (Publisher)

"The author discusses the basic training received at boot camp, Marine Corps schools established for specialized fields of study, the diversity of careers in the service, and the possibilities when participating in the officers training program. Life at a typical Marine Corps base is described, and the Marine Corps Aviation program is explained. Information is as full as it is in the other books in the series, but the text here abounds with trite phrases and worn cliches. The attitude toward the Corps is unpleasantly and extravagantly laudatory, and the author is unnecessarily patronizing toward the citizen who waits to be called rather than volunteering for service." 1 U.S.—Occupations 2 Vocational guidance

"Designed to give people of high school age an orientation to the vocational opportunities in industry, the book covers such topics as skilled craftsmen and unskilled labor; foremen and other managerial positions; the need of industry for scientists, engineers, and technicians; women in industry; office work, including accounting; sales departments, personnel and other specialized types of work. The information is often given in the form of case histories, and the style of writing is smooth and personal rather than strictly factual. As a general introduction to the subject the book is successful, and should be used in vocational guidance, studies of the community or of industry, as well as for the general reader. The author presents work in industry in a favorable light by concentrating mainly on 'ideal' situations, but he does indicate the difficulties of many jobs and the problems that may arise, and, though he encourages the reader to work in industry, he does emphasize the need for education and training in all jobs and the importance of careful planning." Blair, Clay
* Diving for pleasure and treasure, by Clay Blair, Jr. With photographs by Walter Bennett. World Pub. 1960 348p illus $4.95 **387.5**

1 Buried treasure 2 Diving, Submarine

The author first tells how he and his diving partner, Robert Marx, searched for the wreck of the "Monitor" off Cape Hatteras. The bulk of the book, however, is devoted to their discovery of the sunken Spanish galleon, "El Matanzero," off the coast of Yucatan. How the treasures from the two-hundred-year-old wreck were identified, how the history of the ship was traced and the rewards of this adventure, are all described here. (Publisher)

First published 1915

A useful reference book which indexes about 700 titles including "besides fairy tales and fables, the stories from Greek and Norse mythology which seemed most likely to be called for, also hero stories and some modern stories like the 'Leak in the dyke,' which are not strictly fairy tale or legend but which are constantly asked for by teachers and story tellers. The mythology entries have been considerably extended for the second edition, and a special effort has been made to include folk stories of as many nationalities as possible." Preface

1 Fables

A collection of beast tales, the stories of which serve to illustrate some moral or precept

"In selecting these [90] fables from the Croxall edition of 1722 and the James edition of 1848, the editor-illustrator has combined 'the imagination and humor of the two men in order to give a livelier and gayer interpretation.' While the format may appeal more to adults than to children, it is a splendid piece of bookmaking with strikingly original and clear wood engravings." N Y Pub Lib

"Roland, the nephew of the Charlemagne of romance, and his companion in all great enterprises, is unknown to history. Yet he is the typical knight, the greatest hero of the middle ages. His story, as I shall tell it to you, is not a mere transcript of the old romances. The main incidents have been derived from a great variety of sources, while the arrangement and the connecting parts are of my own invention." Foreword

"The story of Siegfried, or Sigurd, is told in the sagas of many Northern lands. We find the stories of Sigurd in the old tales of Iceland—and of Siegfried in Germany. James Baldwin has made his own version, drawing on many sources. Here we have Siegfried, the young prince, apprenticed to Mimer, the master smith. Siegfried forges the sword Balmung and goes forth into the world 'to right the wrong, to help the weak, to punish evil.' He meets and slays Fafnir, the dragon, has many other stirring adventures, and wins a beautiful princess as his bride." Publisher's note

"Entertainment rather than instruction dictated the editor's choice of 90 folktales from Europe and the Orient, arranged by subject to illustrate the dominant motifs of folklore. Since magic and religion prevailed among the peoples of both regions, the realistic tale is not represented. "As outstanding as the best collections of fairy tales of any country, are those of the folk-lore of the British Isles made by Joseph Jacobs. In his re-writing of the stories, he has preserved their humour and dramatic power, and while simplifying dialect, has retained its full flavour. He intends his stories to be read aloud, and while children enjoy them for their own reading, this makes them invaluable for the story-teller who appreciates a colloquial, conversational style." 1 Arthur, King

"In this edition of Mr. Lanier's classic Boy's King Arthur, omission has been made of some minor passages and introductory matter—all the greater tales, those of Arthur, Launcelot, Tristran, Gareth, Galahad, Percival, and the Holy Grail, being retained." Publisher's note

Contents: Of King Arthur; Of Sir Launcelot du Lake; Of Sir Gareth of Orkney; Of Sir Tristram; Of Sir Galahad and Sir Percival, and the quest of the Holy Grail; Of the fair maid of Astolat; Of the death of Arthur

Lanier's version follows Malory's "Morte d'Arthur" (first published by Caxton late in the fifteenth century) more closely than any other edition does. He says in his Introduction, "every word in this book except those which occur in brackets, is Malory's unchanged except that the spelling is modernized. . . . I have also changed the division into books, from Caxton's wholly unreasonable arrangement of twenty-one to six, each mainly occupied with adventures turning upon the hero or event which names it"

"Little is known about the origin of most of our words, but a good number originated in unusual and fascinating ways: from incidents in history, like the words 'horde' and 'kangaroo'; from old games and sports, like 'jeopardy' and 'hazard'; from old customs, ancient gods and myths, and many other sources. Most dictionaries have the space only to hint at a few of these. In a lifetime of work with words, Dr. Funk has collected a wide number of the stories of these word origins, and he presents them in a factual and highly readably way. For anyone interested in how words came into use, this book will provide many pleasant hours of reading. Its almost 700 different entries are arranged alphabetically, and it has a helpful cross-index." Publisher's note

1 English language—Dictionaries

First published 1898. This 1961 "first revised edition since 1934 is evidently intended as a dictionary for our times, for its more than 450,000 entries include 100,000 newly added terms and exclude words obsolete before 1755. Its more than 200,000 quotations illustrate contemporary usage, drawing on many modern writers. Instead of encyclopedic treatment at one place of a group of related terms, each term is defined at its own place in the alphabet with an analytical one-phrase definition. . . . Gone are the biographical and geographical sections, the key to pronunciation at the bottom of each page, while only 3,000 new illustrations replace the 12,000 found in the earlier edition. . . . Thus the dictionary must stand on its true dictionary features—as a source of etymology, pronunciation, syllabication and definition. The etymology traces a main vocabulary entry as far back as possible in English, as to Old English; tells from what language and what form it came into English; and traces the pre-English source as far back as possible. Pronunciation is shown by the Old Webster system with added symbols from the International Phonetic Alphabet, and represents prevailing cultivated conversational usage, both formal and informal, throughout the English-speaking world. The new pronunciation alphabet is designed to represent clearly the standard speech of educated Americans. Syllabication is shown by centered periods. Definitions are given in a single phrase of precise meaning, usually without pictorial illustration." Cur Ref Bks

Cassell's Latin dictionary was first published in 1854; Cassell's Latin-English dictionary revised, in 1886. This 1960 edition, which was first published in England in 1959, is a complete revision of the two sections of the dictionary as it appeared in 1892

"My aim has been to conform to the fashions of the present day, both in English idiom and in Latin spelling; to introduce fresh material from various sources; and in matters of explanation and arrangement to go part of the way back to the simplicity of the first edition. Yet while rewriting much, I have tried to adhere throughout to the traditional principle that 'classical' Latin, the language of what we still consider the best period, should be the prime concern of both parts of 'Cassell's New Latin Dictionary.' The first part is intended primarily to help the student in the reading of such Latin, the second part to help him in the writing of it." Preface

"In the sixteen groups, or departments, of which 'The Book of Popular Science' consists, the reader will learn about the major science and about their applications in the world of today. Each chapter in the set constitutes a unit in itself and may be read as such. . . . For those who wish to read further in a given subject, the editors have provided a bibliography, called 'Selected Readings in Science,' in Volume 10. It contains not only a list of informative books but also a brief evaluation of each book that is listed. . . . At the end of almost every chapter . . . you will find a reference to the appropriate page of 'Selected Readings in Science.' Volume 10 also contains 'Scientific Facts and Figures.'" 1 Science—Experiments

"Thirteen projects demonstrate scientific principles and give an idea of the work and techniques of the scientist in astronomy, zoology, microbiology, mathematics, botany, microscopy, physics, geology, meteorology, biochemistry, and physical, organic, and analytical chemistry. The experiments, which utilize easily assembled materials and equipment, vary in difficulty but are all clearly explained and well illustrated with drawings and diagrams. The book may have some vocational use as well as general informational and entertainment value." Booklist

Its hero is The Celebrated Man in the Street, and its purpose is far more than to provide a painless introduction to the strange new algebras and geometries of modern mathematics. . . . "This book is a thorough revision and a very considerable amplification of two popular accounts of mathematics, 'The Queen of the Sciences,' 1931 . . . [and] 'The Handmaiden of the Sciences,' 1937." To the reader

Here is the story of the developments in pure and applied mathematics from the geometry of Euclid 2200 years ago to the most recent developments in mathematical physics. Over two hundred mathematicians are represented. The material is so organized that the reader can omit difficult or uninteresting sections

1 Mathematics—History

"By explaining the origin and evolution since ancient times of mathematical symbols and processes in use today the author explains the role of mathematics in contemporary civilization and helps the reader understand the mathematical processes themselves. The book is generously and attractively illustrated in color and in black and white with photographs and diagrams, and some aspects of development, such as the contribution of seventeenth-and eighteenth-century card playing to the theory of probability, have a human-interest appeal, but the book is not an easy popularization. It will be of use with students or readers who already have some familiarity with mathematical concepts." Booklist

The author-illustrator has accomplished his purpose most successfully by combining a concise, clear text with facinating illustrations. High school teachers will find this a real help, and students, attracted by the pictures, will read the brief text painlessly." Library J

"The subject of mathematics is approached through some of its practical uses, and is enlivened by suggestions for using mathematical principles in play. The drawn and cut-out figures need only pencil, scissors, ruler, compass, protractor and paint or crayons: designs proceed from simple to complex, with illustrations and instructions to help the reader. While the book may supplement the reader's knowledge and stimulate creative thinking about mathematics, it requires both background and subject interest to be best understood. The topics, the terminology and the diagrams require a considerable amount of channeling of attention; the audience for the book will probably be limited to the student with a special interest. The authors "basing their plans on astronomical realities and sticking strictly to engineering knowledge available today have outlined a master blueprint for man's first exploring trip to Mars. . . . The text is supplemented by a Mars bibliography, tables, diagrams, historical and modern maps." Publisher's note

"The first part is a brief survey of opinions, theories, and actual observations of Mars through the centuries, including the first discoveries of grooves or 'canals' on its surface and the varying speculations about life on the planet. This is not easy reading but it forms an excellent introduction to the second part which discusses the technical problems of future flights and speculates on the planet's possible appearance and living things. Chesley Bonestell's detailed photograph-like paintings are a splendid addition to the text." Horn Bk

The author describes man's first interest in the stars and Copernican and Ptolemaic theory, the observations of Galileo, Brahe, Kepler, and Newton, The revolution of the earth and its path around the sun are considered in detail; the diagrams offer helpful clarification. Such phenomena as centrifugal force, the aberration of light, sun spots and parallax shift are explained. The characteristics of the earth, the moon and other planets are listed, and the ways in which they and the sun are measurable are noted. The author concludes this clearly written book by presenting to the reader the alternate theories of the evolution of the planets." Chicago. Children's Book Center

"A very ingenious and workable method for locating and identifying brighest stars, major constellations, and planets at any hour of any night in the year in the northern hemisphere. The stargazer, by putting himself at the center of an imaginery clock dial and letting the numeral 12 be at the north, can use the other clock numerals to represent all other compass directions. By using the fist as a unit for measuring the height of stars from the horizon, he can direct his eye to any part of the sky. In addition to the simple clear instructions, there are sky maps, charts, planet schedules (through 1965), and an index to lists and maps. 1 Geology 2 Geophysics

"Our own planet poses enough mysteries to last for many generations, and Lester del Rey not only recounts many of the answers to these earth mysteries but also presents a fascinating picture of the earth on which we live." Publisher's note

"Moving from questions about the planet's interior, magnetic fields, and surface features on to the secrets of the sea and its inhabitants, the origin of life, the distribution and extinction of species, the ice ages, and atmospheric phenomena, he discusses various now outmoded theories which have been formulated to account for these puzzles and explains current theories based on more recent knowledge. 1 Geology 2 Scientists

"Beginning with the poet Hesiod's story of creation written in the eighth century B.C., a skillful science reporter summarizes theories of cosmogony according to the ancients, then proceeds to a more detailed recital of geological discoveries and theories from the eighteenth century to the present." Booklist

The story "is told through the adventures, experiments, and investigations of many scientists. Some, like Hutton, Agassiz, and Lyell, studied the face of the earth and examined its varied rocks, glaciers, and fossils. Some, like Logan, Hall, and Dutton, wondered about the rising and falling of land and about the traces of sea bottom in so many inland places. Some like Urey investigated the age of the earth, or like Bullard the interior of the earth. It is not always easy reading but for the one who sticks to it, it makes a fascinating and stimulating introduction to the field of geology." Horn Bk

"The discovery in France of the Lascaux Cave by four boys and their dog, forms the pivot for this description of prehistoric Ice Age art, and of the caves in which various wall paintings and other relics have been found. Because many of these 'findings' have been made by children, the author has attempted to present his information to other boys and girls by a reconstruction of the actual incident, largely in direct narration. . . . The book presents an interesting explanation of the significance of early paintings as interpreted by modern scholars, and, in so doing, produces an absorbing record of prehistoric man's development and his struggle for existence. He makes friends with the natives who finally reveal to him the secrets of the island; he makes breath-taking descents into caves so narrow that he has to slide down feet first with his arms over his head; he demonstrates how the huge figures were quarried and moved. "I have endeavored to present . . . what is known to date, from actual specimens, about the physical development, home life, and environment of primitive man." Preface

"Dr. Andrews is particularly at ease when writing of people and places. However, the very personal quality of the narrative, which makes it readable, creates confusion on the scientific side. No clear picture of human evolution is presented. Fossil men are grouped sometimes by geography, sometimes by time, sometimes by anatomical similarity. "Hundreds of pictures in color of animal and plant life throughout North America, by scientifically accurate artists, plus text written especially for this book by the author of the famous 'Field Guides' to birds." Retail Bookseller

In contrast to the traditional manner of nature books, "Wildlife in color" is arranged, not by family relationships, but by wildlife communities. The closely integrated text and pictures describes all the varied habitats of North America in terms of the trees and flowers that grow there; the mammals, birds, and butterflies that live together among them; the fish and other wildlife of the teeming waters. The result is a vivid and informative cross section of outdoor America

1 Beagle Expedition, 1831-1836 2 Natural history 3 South America—Description and travel

"I consider this truly handsome book one of the most important to be published in many years, on two counts: as a scientific masterpiece of immense interest to aspiring young scientists, and as a superb example of abridgement and editing. The 'Voyage' represents one of the great adventures of all time, physical and intellectual; it reveals a unique person and his growth to maturity in his own words; and it records the painstaking groundwork for a theory which transformed man's thoughts about himself and his world. As to the second count, this abridgement is one of the rare ones for which there is real and sufficient reason. The original 'Voyage' was over 500 pages long, much of it unnecessary to the general reader. In addition, new material from Darwin's letters has been made available only recently. Mrs. Selsam uses this in her brief introductions to each chapter, which serve admirably to pull together and illuminate what follows. Wherever special information is necessary for a real understanding of what Darwin is talking about, Mrs. Selsam supplies it. Darwin's words are never changed, and all omissions are clearly indicated. With Mr. Ravielli's exquisite drawings and useful maps, and with clear and attractive type, this is a book to 'buy' for the permanent library of any serious young reader and/or scientist." Horn Bk

First published 1947. "The new edition is a revision and enlargement, with many new areas covered which were neglected in the first edition." Publisher's note

An explanation of the fundamental principles of heredity—from the Mendelian laws to the latest concepts based on recent discoveries in the genetics of microorganisms. The author clarifies the technical aspects of heredity by the use of specific examples, supplemented by effective charts and diagrams. He deals with such important topics as heredity versus environment, determination of individual traits, lethal genes, the inheritance of diseases, the breeding of plants and animals, human blood types, and the possibility of race improvement. His book fulfills the task of bringing the general reader abreast of scientific knowledge about how we came to be what we are and what changes the traits of successive generations. (Publisher)

1 Animals—Habits and behavior 2 Cameroons, British—Description and travel 3 Zoology—Cameroons, British

"Two young English scientists set out in West Africa on a six month's collecting trip for the English zoos. The fact that these young men were interested chiefly in studying and collecting the most unusual animals and birds sets this book apart from the 'lion-tiger' type of narratives." Library J

"Collecting rare animals and birds in the Cameroons was fun for the author and his friend, but his account of their adventures suffers from British understatement, thereby limiting the appeal to the more discriminating readers." Booklist

graphs, chiefly by Sanborn, Keller, and Underwood and numerous charts and maps." Title page

Popular treatment of the living vertebrates of North America intended to bridge the gulf between scientific treatises and nature study literature

"It is a bulky volume, richly illustrated with photographs and packed full of facts. Mr. Hornaday's life has been spent among wild animals, as hunter, trapper, keeper, collector; and this, in spite of the very scientific cast of the book, often gives it a personal, first-hand flavor hardly to be expected in a general natural history, even when limited to American fauna." This book "bears a strong conservation message for both naturalists and the general reader. It is a history of the vanishing North American wildlife and account of what is being done to prevent its extinction. Region by region, the continent's wild animals and birds that man has decimated or exterminated are described." Pub W

"Explorers' narratives and other old accounts are drawn on frequently for descriptions of the animals as they were. . . . Illustrated with drawings made for the book and a selection of classic drawings, paintings, and photographs." Booklist

1 British Columbia—Description and travel 2 Zoology—British Columbia

The chapters "which are made of my diary, are the story of a wilderness and our relationship with it; a tale of those still vast solitudes of northern British Columbia, so hard and inaccessible that much of them has not yet been lived in, or even penetrated by mankind. . . . We wanted to make detailed and accurate observations of the life of the Driftwood region; to understand the lives and problems of the wild things about us as they passed through all four seasons of the year, particularly during the long winter of a far-northern forest, a season in which comparatively few scientific studies have been made of wildlife." 1 Birds

Also available as part of An introduction to nature, class 574

"This is not a pocket-size field book but a large flat one providing ample room for the nonscientific, entertaining, and very apt descriptions. So well has the author succeeded in his aim to 'provide the beginner with an elementary guide to a friendly acquaintance with . . . birds,' that the reader would very likely be able to recognize many of those discussed long after reading the book. Birds are listed in much the same order that one might see them, and are illustrated in color. Junior and senior high school." Booklist

Adamson, Joy

‡ Born free; a lioness of two worlds. Pantheon Bks. 1960 220p illus map $4.95 **599**

1 Kenya Colony and Protectorate—Description and travel 2 Lions

The wife of a game warden in "Kenya tells how she and her husband adopted an orphan lion club, reared her as a household pet, and finally, when she was a full-grown lioness, turned her free to live in her natural habitat. The Adamsons' experiences in raising and training Elsa, the adventures they shared with her among the wild inhabitants of the African bush, and the methods they used to teach her to fend for herself and rejoin her own kind make an unusual true animal story. Appealingly written and illustrated with unusual photographs." Booklist

Sequel to: Born free

"Continues the story of Elsa, from the time the Adamsons knew she had mated with a wild lion through the birth and rearing of her three cubs to shortly before her death. Since Elsa maintained the bond of affection with her human friends even after her return to a natural life in the Kenya bush, they were able to observe her reactions and follow the development of her family. This absorbing, photographically illustrated record of a unique human-animal relationship makes a distinct contribution to the science of animal behavior." Booklist

1 Medicine as a profession

"After a brief examination of the rewards and responsibilities of being a doctor and a realistic appraisal of the gamble involved in seeking a medical degree, the writer [a doctor] gives an informal, but detailed description of medical training. He discusses the purpose and requirements of premedicine, application for admission to medical school, the medical school curriculum year by year, and the work of internship and residency, also considering such topics as financing a medical education and finding alternate opportunities in allied fields. A simple, practical guide for high school and college students seriously interested in a medical career." Booklist

Find a career in medicine. Putnam 1960 160p illus $2.75 **610.69**

1 Medicine as a profession

Describes the preparation needed in high school and college years for a medical career, the training itself—medical school, internship, and residency—and the choices of general practice and some of the fields of specialization. Mr. Starrett gives a brief resumé of medical history as a preface to the above, and concludes with chapters on careers in related fields, and on the challenges of medicine in the future. The tone of the writing is a bit evangelistic, and the author talks down somewhat to his audience. . . . Most of the material covered is presented in a more interesting style in Coy's 'Doctors and What They Do' [entered above]." Chicago. Children's Book Center

1 Nurses and nursing—History 2 Nursing as a profession

"An interesting, very readable, and informative account of the history of the nursing profession and of some of the fields of nursing that are open to girls and women of today, together with brief sketches of some of the outstanding women nurses of the past and present. The account does full justice to the glamor that this profession has for many girls, but it also gives a clear, accurate picture of the difficulties of both the training and the work itself. The book will make an excellent addition to collections of vocational guidance material and will provide girls with a much more salutary introduction to the field than they will get from career fiction on the same subject." Chicago. Children's Book Center

Part one tells about the heritage of the nursing profession—of the women such as Florence Nightingale, Dorothea Dix, Clara Barton, Mary Ann Bickerdyke, Kate Cumming, Linda Richards, Lillian Wald, Estelle Massey Osborne. Part two tells about present conditions and plans for the future in private, hospital and public health nursing

1 Nurses and nursing

"A compilation of true stories by and about nurses, each by a different author and all reprinted. Some of the selections are excerpts, some complete; there is, of course, great variation in style: 'Adventures of a Nurse's Aide' is over thirty pages long, sprightly and informal, humorous; 'Mother Alphonsa' is a bit over four pages, rather trite and flowery. Some of the subjects are famous: Sister Kenny or Florence Nightingale; some are prototypes: the male nurse in wartime, the visiting nurse in a large city. Most of the selections are interesting enough to hold the attention of the casual reader, and for the reader with a special interest in nursing, the book will hold a special fascination." Chicago. 1 Medicine—History

"A history of medical science which, while written in an interesting style, is somewhat loosely organized and is not indexed. The growth of the profession of medicine, the war against germs, the great discoveries, and the recent advances in disease control are described. The author gives brief explanations of the structure and functioning of the circulatory, nervous, and digestive systems; genetics and endocrinology are also remarked upon. Many of the excellent illustrations are in themselves attractive as well as informative, but the notable flaw of the book is the crowding of oversize pages by the illustrations of various periods, techniques, color schemes, and sizes." First published 1893 with title: Textbook of anatomy and physiology for nurses. The 1961 edition has been revised, partially rewritten, and brought up to date particularly in the sections on the citric acid cycle, enzymes, hormones, minerals, vitamins, and the nervous system

"The questions of how best to organize learning experiences and whether anatomy and histology should precede physiology have been again considered. We still believe that there are advantages in studying anatomy and physiology together, each giving immediate meaning to the other. . . . Actually, what is needed for a real understanding of either anatomy or physiology is a study of each in terms of the other, or an appreciation of the interlocking relationships of structure and function. Physiology has been elaborated and reinforced. In many instances it is integrated with discussion of anatomical structure to clarify points of issue." Preface

1 Aeronautics—Medical aspects 2 Space flight

A discussion of the experiments and work being done to solve the problems of manned space flight. "After explaining what is already known about how the human body reacts to extremes of atmospheric pressure, temperature, and speed, the author goes on to describe tests and devices for determining effects of stress, noise, confinement, and monotony on human beings. Final section is devoted to supersonic aircraft and problems of designing space ships. Many useful diagrams and illustrations, although some of the latter are too garish and sensational to appeal to the serious reader. These and the oversize make-up of the book may prejudice older high school students and adults against it, but text is more suitable for them than for younger ages. Timely subject, well presented by an authority in the field." Library J

1 Nautilus (Submarine) 2 Submarines—History

"An interestingly written account of the development of the submarine from the time of Bushnell's 'Turtle' to modern days. Although the major emphasis is on the description of the new atomic submarine, 'Nautilus,' there is much information about other types of submarines as they are contrasted with the 'Nautilus,' and there is a very clear discussion of how atomic power is produced. The material is well organized and quite readable even for persons not versed in the lore of submarines or atomic energy." Chicago. Children's Book Center

1 Bridges

The author "surveys the history of bridge building in America from the early covered bridges of New England to the projected superstructures of tomorrow. He traces changes in materials and design, showing how, with the increased demands of heavy, high-speed traffic, the wooden wagon bridge, stone arch, and iron truss gave way to revolutionary shapes of steel and prestressed concrete in the modern arch, cantilever, and long-span suspension bridge; a special chapter explains graphically how bridges do their work. A lucid and informative book for either reading or reference." Booklist

"From her course on attractive grooming for teen-age girls, a high school art

Broadbent, Adah—*Continued*

teacher gathers fashion hints on the use of pleasing color and flattering line, tips on accessories, separates, summer and rainy-day wear, and suggestions for personal grooming, posture, voice, and poise. Her sensible and economical advice, delivered in an easy, personal manner, emphasizes the simple fundamentals of attractive appearance." Booklist

"The relationship between art and personal glamour is never made very clear and is quite obscure at times. Girls who already know enough about art to understand the author's terminology might benefit from the book, but its chief value is for use by guidance and home arts teachers." Chicago. Here's to you, Miss Teen; a guide to good grooming and poise; illus. by Lali. Winston 1960 233p illus $3.95 **646.7**

1 Grooming, Personal

"A book with guaranteed appeal, compact, concise, practical, and detailed in its advice on grooming 'teenmetics,' hair, figure care, clothes and poise. Accent is on grooming, not on personality. Though aimed at the 13-17 age group, it is probably more for the 12-15-year-olds. Author avoids cute comments, and the book's only coy aspect is its paging division into varying shades of pastel, presumably for easier reference. Has a calorie counter, [grooming calendar, figure chart] index, and is cleverly illustrated." Library J

1 Art 2 Clothing and dress 3 Interior decoration

The object of this book is to show the principles of art as they are seen in familiar works of art, and as they are related to every day problems, such as house design and decoration, store decoration, costume design, advertising, and city planning. In each of these fields one works with sizes, shapes, colors, and textures, which must be selected and arranged in accordance with principles of beauty. These principles are fully explained, and they are applied in so many various fields that even the person without native ability can learn to apply them to any problem. A significant feature of the book is the profusion of illustrations—both photographs and drawings—which clearly demonstrate the main points of the text." Preface to the first edition

There is a general historical introduction, description and appreciation of each painting by the editor

"I have adhered throughout to a central purpose: the reproduction of paintings which time has claimed for permanent glory—immortal possessions revealing the characteristics of the period, and the personal variations inscribed by men of genius on the general pattern. . . . No pains have been spared to make the selections truly representative; to illustrate not only general tendencies but diversities in styles and subject matter—the scope of painting and how it has been practiced from the thirteenth to the twentieth century." 1 Painting—History 2 Paintings

First published 1952. Reprinted with slight changes and corrections

"This excellent book for young readers opens with reproductions of stone-age cave paintings and closes with a landscape by Dali. In all it includes 146 reproductions, 65 in full color, which have been judiciously chosen to introduce the beginner to the major periods and schools of painting. The selection of pictures, which of necessity had to be more exclusive than inclusive, is nevertheless a happy blend of orthodoxy and originality. . . . The story of 20,000 years of painting . . . is competently handled by Mr. and Mrs. Janson, who write with grace, spirit and what is more important (and all too rare in the field of art criticism): clarity." B O M News

"I welcome the last chapter, 'Painting in Our Own Time.' It seems to me that contemporary art has a direct appeal to young people. The authors have made a noble attempt to organize modern painting in three broad groups; expressionistic, abstract and fantasy." Horn Bk

"A representative survey, produced under the sponsorship of 'Time' magazine, of three centuries of painting in America from the pioneer limners to the present-day abstractionists. A candid, popular style and quoted conversations or contemporary opinions result in an easy informality in the critical and biographical material. Primitives, folk artists, naturalists, and recorders of the American West are not neglected in a review which attempts to interpret all phases of American painting to the layman with little or no training in the arts. A guide to 100 collections of American painting, chronological charts, and a bibliography are appended. Excellent reproductions." Booklist

"To bring the fifth edition of 1954 completely up to date has not been the principal aim in the planning of the present volume. No consistent attempt has been made, for instance, to complete all the catalogues of composers' and authors' works down to the year 1960, or indeed any year between 1954 and now. . . . Nevertheless, catalogues have in a great many cases been improved, and important new works, as well as many not so important, have been entered so far as information has been available. . . . What 'has' been added, though admittedly in an inevitably haphazard, hand-to-mouth kind of way, will often, I am sure, be found very useful, so much so that the absence of other accessions will, I hope, be thought excusable as well as understandable." 1 Rhetoric

First appeared 1918, privately printed; first trade edition published by Harcourt, 1920

"The book consists of a short introduction, eight rules of usage, ten principles of composition, a few matters of form, a list of words and expressions commonly misused, a list of words commonly misspelled." Introduction

"In the introduction Mr. White says that this was Professor Strunk's 'attempt to cut the vast tangle of English rhetoric down to size and write its rules and principles on the head of a pin.' He himself always referred to it as 'the little book.' As the editor says, it is clear, brief, and bold, pithy and pungent, very useful and very readable." Library J

"The book is an effort to discover the secret of the delight that poetry gives us, in what the magic of the poetic imagination consists, and in what ways we may best train ourselves to recognize and enjoy it. Miss Drew illustrates her points with many quotations from poetry both old and new." Book Rev Digest

"Such a book as this will suggest, even to those who have long made companions of the poets, fresh points of view and richer meanings. To those who for whatever reason, because poetry seems difficult, or what not, have avoided poetry, it opens new and lovely paths to reluctant feet. By means of the abundance of poetry quoted—on a rough guess perhaps even as much as one-fourth of the book is quoted poetry—the author lures one along the enchanted way." N Y Times Bk R

"Two methods are used in this examination of the values and appreciation of poetry—quoted poems or excerpts followed by critical comment and exposition illustrated by whole poems or parts of poems [English and American] poets represented range from Chaucer to Eliot. The accent is on poetry as an art and craft and on poetry as it expresses the poet's feelings and thoughts on time, death, love, nature, religion, and humanism. A particularly revealing chapter presents several poets' reflections on poetry in both prose and verse. An appendix provides information on meters and verse patterns and a bibliography." Booklist

First published 1952

"With 'The Confident Years' I bring to a close the series of [five] historical volumes that bears the general title 'Makers and Finders; a History of the Writer in America, 1800-1915'. . . . I have tried to define the American tradition in letters." Note

An inclusive picture of the American literary scene from New York to San Francisco, from Chicago to New Orleans discussing such authors as: Stephen Crane, Ambrose Bierce, Frank Norris, Jack London, Lafcadio Hearn, O. Henry, Edith Wharton, Theodore Dreiser, H. L. Mencken, Eugene O'Neill and many others

1 American literature—History and criticism 2 American literature—New England 3 New England—Civilization

An Everyman's library edition of a book first published 1936

The second volume of the author's five volume series: Makers and finders; a history of the writer in America, 1800-1915

"Van Wyck Brooks has fused into a glowing narrative, not only the atmosphere of the period [from 1815-1865] but also charming, mellow and authentic portraits of the leading figures from Ticknor, Prescott, Hawthorne, Emerson, on through [Thoreau, Longfellow] Lowell, Motley and Holmes. There are brilliant summaries of each one's work; and there are delightful recreations of groups gathered in clubs or at Brooks Farm, and of friendly talk on a walking trip. As the chronicle lengthens, changing phases are noted in the times, as well as in individuals and their writings." N Y Libraries

Although this is the fourth volume in the author's series: Makers and finders; a history of the writer in America, 1800-1915, it constitutes a sequel to: Flowering of New England; taking up the thread of the previous volume

Partial contents: Dr Holmes's Boston; Howells in Cambridge; Henry Adams; Henry James; Aldrich and his circle; Emily Dickinson; Boston in the nineties; The Adamses; Pre-war years

* Our literary heritage; a pictorial history of the writer in America, by Van Wyck Brooks and Otto L. Bettmann. Dutton 1956 241p illus $8.50 **810.9**

1 American literature—History and criticism

"One sixth of the material in the five volumes of 'Makers and finders: a history of the writer in America, 1800-1915' is compressed into a book studded with photographs and drawings from the Bettmann Archive. Lack of room forces out the lesser figures but the major authors and eras in American literary history are not slighted; both text and pictures capture the spirit of American literature and bring to mind the diverse threads from which it is woven." 1 Negroes—Drama

Awarded the Pulitzer Prize for 1930
First produced February 26th, 1930 at the Mansfield Theatre, New York, 59 characters

"A play in two parts and seventeen scenes, more or less based on Roark Bradford's two books of sketches of the deep South. It is a Negro interpretation of the Bible as it shows progressively God's dealings with his sinning suffering earth-people, from the Creation to the Redemption." Cleveland

Goodrich, Frances

* The diary of Anne Frank; dramatized by Frances Goodrich and Albert Hackett; based upon the book, Anne Frank: Diary of a young girl; with a foreword by Brooks Atkinson. Random House 1956 174p illus $3.50 **812**

1 Netherlands—History—German occupation, 1940-1945—Drama

Pulitzer Prize play for 1956

"Based on Anne Frank's 'The diary of a young girl.' Using the device of spoken passages from the actual diary, together with more conventionally staged scenes . . . [the authors] have translated the fire and evanescence of a fifteen-year-old's secret thoughts into a forceful and workmanlike drama. As in the original book, the horrors of war and genocide, and the poverty of narrow souls are the more poignant for being seen through such naïve and hopeful eyes." Booklist

Ross, Leonard Q.

* The education of Hyman Kaplan. Harcourt 1937 176p (Harbrace Modern classics) $2.50 **817**

"These sketches from the 'New Yorker' record the progress of Mr Kaplan, a student in the American Night Preparatory School for Adults. It is Mr Kaplan who declines the verb 'to fail' as 'fail, failed, bankropt,' and gave the plural of dog as dogies, Library as Public library, and cat as Katz. Enough to indicate the characteristic and amusing Jewish humor." Wis Lib Bul

The return of Hyman Kaplan. Harper 1959 192p boards $3.50 **817**

"The incorrigible and irrepressible Mr. Kaplan has returned to spend a second term in Mr. Parkhill's beginners' grade at the American Night Preparatory School for Adults. The long and difficult road to learning is again strewn with unique spellings, mispronunciations, and amazing linguistic logic as Kaplan leads his fellow immigrants in their assault upon the English language. Though perhaps lacking the freshness of 'The education of Hyman Kaplan' [listed above under L. Q. Ross] the 12 chapters, most of which appeared in the 'New Yorker' and 'Harper's Magazine' are still funny enough to please a wide audience." Booklist

1 Life

The setting is the sea shore; the time, a brief vacation which had lifted her from the distractions of everyday existence into the sphere of meditation. As the sea tosses up its gifts—shells rare and perfect—so the mind, left to its ponderings, brings up its own treasures of the deep. And the shells become symbols here for the various aspects of life she is contemplating

"Reflections on the writer's search for outward simplicity, inner integrity, yet fuller relationships with family and friends. The observations are expressed with poetic sensitiveness and will find sympathetic response among readers striving for a balance in fulfilling their obligations to a family and to themselves as individuals." 1 Dogs

"Mutt, a dog who shared 10 years of the writer's happy boyhood in Saskatchewan, Canada, persistently refused to be a mere canine. A mongrel of uncertain antecedents and dubious appearance, he early exhibited a propensity for climbing trees and ladders and improving upon ordinary bird-dog techniques, a weakness for skunk chasing, and a fancy for riding in the family car wearing driving goggles. While centered on the exploits of Mutt, these fresh, sometimes riotously funny reminiscences also relate the author's experiences with two owls named Weeps and Wol and other highly individualistic pets." s

"A collection of twenty-four stories, all but two of which are in verse, written by Geoffrey Chaucer mainly between 1386 and his death in 1400. The stories are supposed to be related by members of a company of thirty-one pilgrims (including the poet himself) who are on their way to the shrine of St. Thomas at Canterbury. The prologue which tells of their assembly at the Tabard Inn in Southwark and their arrangement that each shall tell two stories on the way to Canterbury and two on the return journey, is a remarkable picture of English social life in the fourteenth century, inasmuch as every class is represented from the gentlefolks to the peasantry." One of the primary purposes of the 1959 edition "continues to be to help teachers help children become so familiar with poetry—both old and new—they will grow naturally into young people and adults who like it and interpret it effectively for themselves. To reach this point, children must hear quantities of poetry read, must join in saying it themselves, and gradually learn to explore a new poem by readnig it aloud. . . . It is the poem's unique sound pattern that is the clue to its meaning. This is true from Mother Goose to Shakespeare [the range of this volume]." Why take time for poetry?

First produced on March 15, 1773 at Covent Garden, London

Written in a day when sentimental comedy reigned, this play is a pure farce in five acts, presenting contemporary characters of the time in a purportedly realistic framework. It is the story of the Hardcastle family's mishaps and adventures in their undertaking to wed a single daughter

"The author's masterpiece. A delightful example of the best type of English society comedy." Pratt Alcove

Shaw, Bernard

* Androcles and the lion, Overruled, Pygma-
s lion. Dodd 1916 cxxvii, 224p $4 **822**

"Probably Mr. Shaw would consider the most important part of this volume to be his one hundred and twenty-seven page introduction to 'Androcles,' in which he sets forth in all its phases his theories of Christian sociology, beginning with a review and interpretation of the Four Gospels. 'Overruled' is a farcical comedy concerned with the gallantries of married people, the slight preface dealing with sex in conduct and art. 'Pygmalion' has no preface, but is provided with a sequel carrying forward the history of the characters several years and disposing of them in ways for which those who see the play without first reading the sequel will be scarcely prepared." A retelling of the plays, comedies, tragedies, and histories included in Shakespeare's "First folio." "Its purpose is to give the reader a preliminary idea of each of the thirty-six plays by telling the stories and explaining in a general way the intentions and points of view of the characters." Introduction

"These resumés of the 36 plays of the First Folio, with a few explanatory paragraphs about the intent or background of each play, keep more to the dramatic form than do Lamb's 'Tales' and are for older young people. Less space is given to each play; plot outlines are very clear and the characters genuinely Shakespeare's. Full index of names. Read along with the author's other books about the playwright and his times, this should be good preparation for a real appreciation and enthusiasm for the plays themselves." Library J

1 Legends—India

At head of title: The story of the great Hindu epic Ramayana

Based on the Valmiki version of the ancient Hindu epic of the Ramayana. The story relates the adventures of Prince Rama, an incarnation of the Hindu god, Visnu. Unjustly banished from his kingdom, Rama fled with his wife, Sita, to the south. Sita was captured by the wicked king, Ravan, but after many difficulties Rama succeeded in winning back both his wife and his kingdom

"A skillful and extremely readable prose retelling of the Hindu epic." Booklist

"For younger readers this book will have much the same appeal as the Greek myths and legends; for some of the more perceptive older girls it could be read as a love story comparable to that of Tristan and Isolde or Aucassin and Nicolette. . . . 1 Civilization, Ancient 2 History, Ancient

"A fascinating, well-organized, highly readable history of civilization from 4,000 B.C. to 14 A.D. It is far more than the dreary facts of wars and conquests, dynasties and kings. Its scope is wide, including ordinary citizens and how they lived as well as the great leaders. Mores, social customs, trade and commerce, art, architecture, and military enterprises are among aspects included. Ten beautifully colored maps relate events of text closely. Many striking drawings with humor and informative captions. This is distinctively edited and should inspire intelligent interest in ancient history. Best for high school and young adult readers, but advanced junior high students could use. Excellent table of contents with dates, detailed index including pronunciation key, and annotated, classified bibliography (adult books)." Massachusets

1 Eighteenth century 2 Washington, George, President U.S. 3 World history

Companion volume to: Abraham Lincoln's world, listed above

"This book tells . . . the story of George Washington's life, of the people who were living when he did, both in America, and all over the world, of what they did when they were children, how later on the pattern of their lives fitted together, and what part each one played in that greatest of all adventure stories, the History of the World." Page viii

"A clear picture of the world of the 18th century, not only of the kings and statesmen and generals, but of the poets, artists and musicians, by means of a series of close-ups of the characters, each with a bit of background connecting the picture with other close-ups and fitting it into the whole panorama. 1 Gazetteers

Based on the 1905 edition of Lippincott's New gazetteer, which superseded the 1855 Lippincott's Pronouncing gazetteer

"Includes 130,000 articles with over 30,000 cross-references in a 3-column, thumb indexed, buckram bound cyclopedia of places. The new 'Gazetteer' has half again as much material as its godfather, 'Lippincott's Gazetteer' of 1905. All places of any importance, alphabetically arranged, past and present, are identified. Long, comprehensive articles are devoted to large and significant geographic areas with shorter articles on smaller areas. Geographic features of the world are described thoroughly and a wide coverage with essential facts about each place, is apparent. Ancient, Biblical, and archeological sites, as well as modern communities, all over the world, are included. The main entry is under an English name when it has one. Transliterated names furnish parallel listings hard to find elsewhere. Pronunciations are given with simple symbols to make as usable as possible. Three preliminary pages give abbreviations and keys to population figures and pronunciation." Cur Ref Bks

And there was a Polynesian legend of a great Chief Tiki who had come from the east. So he built a balsa log raft lashed together with ropes, just as the old chief's men would have built it, and with five companions and a parrot set out to drift across the Pacific Ocean. Moscow, Alvin
Collision course; the Andrea Doria and the Stockholm. Putnam 1959 316p illus $4.50 **910.4**

1 Andrea Doria (Steamship) 2 Stockholm (Motorship)

"This is an account of a major sea disaster. The author, an experienced AP reporter, follows men and their actions as the luxury liners 'Stockholm' and 'Andrea Doria' draw together, collide, and then drift apart—the 'Stockholm' to remain afloat with a shattered bow, the 'Andrea Doria' to capsize slowly and sink. Moscow describes navigational procedures, effects of collision, reactions of crew and passengers, and rescue operations. He highlights individual courage and a few almost miraculous escapes. He discusses the technical aspects of ship construction, use of radar, etc. He attended the long court trials which tried to fix responsibility for the crash. No decision was made as the case was settled out of court but the reader gets enough evidence to make up his own mind. This will certainly be popular with all readers who like excitement as well as with those who enjoy detective work involved in explaining how and why such disasters take place." Horn Bk

1 Discoveries (in geography) 2 Explorers

"A well-organized, fascinating survey which traces, through the adventures of great explorers, the history of world exploration from the Egyptian Hannu's expedition to the Land of Punt 4,000 years ago to the polar discoveries of Amundsen and Byrd. The book is long but less difficult than it appears; the fluid style of writing, short chapters, occasional dialog and numerous maps showing the routes of the explorers, contribute to its readability. Challenging material for the more serious reader and useful for reference." Booklist

1 Discoveries (in geography) 2 Explorers

True stories of exploration and discovery, retold from original material, journals and ships' logs. Includes such explorers as: Columbus, Vasco da Gama, Magellan, Orellana, Sir Francis Drake, Frobisher, Hudson, Joliet, and La Salle, Captain Cook, Mungo Park, Lewis and Clark, David Livingstone, Burton, Stuart, Nansen, Sven Hedin and Captain Scott

"In his attempt to condense explanations into a few sentences, the author frequently makes statements that are not literally true, or that are over-simplified to the point of being misleading. . . . The maps are tantalizing in their lack of detail. The fine type and uneven inking will deter many readers and there is little about the book to whet a reader's appetite for fuller accounts of these same voyages." Chicago. Children's Book Center

j Spice ho! A story of discovery; drawings by Wilfred Jones. [2d ed. enl] Knopf 1947 207p illus $2.75 **910.9**

1 Discoveries (in geography) 2 Spices

First published 1941

"The desire for spices to make the limited fare of the Middle Ages more palatable spurred [such men as Vasco da Gama, Prince Henry of Portugal, and Magellan] to exploration, and both men and nations risked much. Venice, Portugal, England, Holland, and finally even America figured largely in this race to get control of the spice market." Library J

"Mrs. Hewes writes fascinatingly of the development of trade over the face of the earth, of spicy isles in the Orient, of bitter rivalries between nations, and sadly, too, of greed and cruelty to natives and the vanquished. Here is color and romance and high adventure." Horn Bk

1 Adventure and adventurers 2 Discoveries (in geography) 3 Voyages and travels

First published in England 1957 with title: Boy's book of exploration

"Contains 12 firsthand accounts, prefaced by brief editorial notes, in which outstanding explorers describe high moments in their experience. Shackleton's Antarctic Ocean crossing, Lindbergh's flight from New York to Paris, Byrd's solitary ordeal in Antarctica, Cousteau's first aqualung dive, Casteret's descent into Pierre Saint-Martin, Heyerdahl's 'Kon-Tiki' voyage, and Hillary's conquest of Everest are among the extracts, all from well-known adult books, which embody the true spirit of exploration. Recommended as an inviting cross section of modern exploring adventure where this type of anthology is used with teen-age readers." Booklist

This book contains the story of discovery, and of the men who set out to conquer the unknown: Jenghis Khan, Prester John, Marco Polo, Tamerlaine, Henry of Portugal, and many other adventurers. Includes words and music of 14 songs that were sung by explorers

"While the sound organization of the book, its index, charts, maps, etc., make it invaluable for libraries and schools, I am primarily concerned with its clear, dramatic sweep from the Unknown World of the 13th century to 1940. It is one of the few books which make history come alive to growing boys and girls." Horn Bk

1 Egypt—Antiquities

"A vivid picture of a significant period in the history of ancient Egypt emerges from this richly detailed book. Prefaced and concluded with descriptions of the investigations that have given us the knowledge of the period, the body of the text deals with the Egyptian scene at the time of Tutankhamen's reign. The black and white illustrations (based on ornamentation found in the tomb of the Pharaoh) are stylized and handsome. The author has quoted several passages from scrolls or inscriptions; the fact that these are still pertinent and humorous make the Egyptians of three thousand years ago seem the more real." Chicago. Roman life in the days of Cicero; sketches drawn from his letters and speeches. Biblo & Tannen [1959] 291p $3.50 **913.37**

1 Cicero, Marcus Tullius 2 Rome—Social life and customs

A reprint of a book first published by Dodd with preface date 1883

"This book does not claim to be a life of Cicero or a history of the last days of the Roman Republic. . . . I have tried to group round the central figure of Cicero various sketches of men and manners, and so to give my readers some idea of what life actually was in Rome, and the provinces of Rome, during the first six decades —to speak roughly—of the first century B.C. . . . Hence it follows that I give, not indeed a life of the great orator, but a sketch of his personality and career." Preface

Useful supplementary reading for classes studying Latin, ancient history, or literature

Original French edition published in Paris 1954

"Basing his study on the poems of Homer, and with frequent reference to those of Hesiod, Mireaux . . . [gives a] clear presentation of aspects of everyday life in a society which had its share of complexities. Not the least of these was the relationships with the gods and demigods who . . . gave special meaning to otherwise trivial occurrences. . . . "With the same clarity, simplicity and scholarly thoroughness which made his earlier book [‘Life on a medieval barony’, class 940.1] memorable, [he] has investigated the social life of an English community of the sixteenth century. . . . The present volume, although its results reflect less obvious credit upon the author, has been a far larger labor. First published 1879 with title: Travels with a donkey in the Cévennes. This edition has spine title: Stevenson's Travels with a donkey

"In twelve days, from September 22, 1878, until October 3, 1878, Robert Louis Stevenson walked from Le Monastier to St. Jean du Gard in the Cevennes. His only companion was Modestine, a donkey. He traveled as his fancy led him. . . . More absorbing than the pleasure with which Stevenson contrasted his vagabond life and that of deeply-rooted monks and peasants was his interest in long-remembered, local conflicts. . . . He thought the Cévennes remarkably beautiful. Stevenson's account of the local peasantry was less appreciative than his account of the landscape." Magill, Masterpieces

It "has lively fancy, frequent touches of poetry and sparkling humor, making it one of the most enjoyable of Stevenson's autobiographic writings. The sketch of the seemingly meek but really stubborn and aggravating donkey, whom he becomes fond of in spite of himself, is delicious." Keller's Reader's Digest of Books

"The account of the French Himalayan Expedition which in 1950 conquered the 26,493 foot peak of Annapurna and so holds the record for the greatest height yet attained by climbers. Nothing about the feat was easy. A lot of precious time was spent in finding Annapurna, since the country through which the men traveled was largely unmapped. The route to the top led through snow fields, across glaciers, up sheer ice and rock walls. At one time, Herzog was swept to the edge of a precipice and saved only by a loop of rope around his neck and leg. The two men who reached the peak suffered frostbite of hands and feet and knew the agony of a perilous descent in a race against death. A book of triumph and courage." Horn Bk

"The daughter of Mme. Pandit and the niece of Nehru writes of her youth in India and her four college years at Wellesley. Born into a family of wealth and position, she saw grandfather, father, mother, uncle, and elder sister taken off to prison at various times as they stubbornly supported Gandhi in his fight for Indian independence. Her portrayal of her family is warm and delightful; her close-ups of India's great modern figures such as Gandhi and Nehru make real people of them. The title refers to an occasion when she once enjoyed a special chocolate cake just before her father was arrested and is an apt description of the odd mixture of luxury and prison terms which characterized her family's lives. "An historical and sociological survey that contains material from the author's 'Inside Africa,' written for adult readers. Physical description and industrial development are subordinated to political considerations. A good supplement to Paton's 'The Land and People of South Africa [entered below] which gives more detailed historical and geographical information. Much attention is given to 'apartheid' and to the pressures of segregation and integration that influence almost every activity in South Africa today. Despite occasional passages liable to misinterpretation, this is a valuable book; the vastness, strength, wealth, and growing importance of Africa in the world today is made manifest. Geographical sections studied are Angola, Northern and Southern Rhodesia, Mozambique, Bechuanaland, South West Africa, and the Union of South Africa. Indexing is extensive." Chicago. * The land and people of South Africa. Lippincott 1955 143p illus map (Portraits of the nations ser) $2.95 **916.8**

1 Africa, South

"In travelogue style, the author takes the reader on a tour of South Africa, with a detailed look at some of the major cities and the more important points of interest, such as the Kruger National Forest. Interwoven into the descriptions are accounts of the various racial and national groups that make up South Africa; the part that each group has played in the development of the country, and a serious, objective discussion of the problems that the people of South Africa are facing today. The author makes no effort to conceal or in any way minimize his own views on the racial problem, although he is also scrupulously fair in stating the point of view of the opposition. The result is a thought-provoking book that is much more than just a geography or travel book and that will greatly aid young people in this country to understand the South African situation as they read of it in newspapers and magazines." Lincoln's sons. Little 1955 373p illus $5 **920**

1 Lincoln family

"This book attempts to recover . . . the personalities and lives of the sons of Abraham and Mary Lincoln. It is the story of four boys, [Robert, Edward, William and Thomas called Tad] born into a typical American family in the eighteen forties and fifties and their growing up, first in a primitive little town in Illinois and then in the White House, the storm center of the nation engaged in a great civil war. . . . After the assassination of Lincoln the strangely tangled lives of the eldest and youngest sons are followed to the end." Foreword

* The Peabody sisters of Salem. Little 1950
s 372p illus $5 **920**

1 Hawthorne, Sophia Amelia (Peabody) 2 Mann, Mary Tyler (Peabody) 3 Peabody, Elizabeth Palmer 4 Peabody family

"The Peabody sisters were interesting individuals themselves but of greater importance in their story was their association with the literary and educational leaders of nineteenth-century New England. In this account all these personages are treated with the intimacy of a respectable gossip column. Elizabeth, the oldest sister and the indomitable educator, is admired for her unfailing vitality. Mary is appreciated for her calm steadiness as well as for her role as Horace Mann's second wife, but Mrs. Tharp is partial to the delicate Sophia, the youngest, who became the wife of Nathaniel Hawthorne." 1 Howe, Julia (Ward) 2 Mailliard, Anna Eliza (Ward) 3 Terry, Louisa (Ward) 4 Ward, Samuel

Set in early 19th century New York this story of the Ward family tells much about the renowned Julia, her marriage to the social reformer, Samuel Gridley Howe, her own subsequent career as a crusader for freedom, and her writing of the "Battle Hymn of the Republic." It recounts also the stories of Louisa who married the sculptor, Thomas Crawford, of Anna who married the grandson of Napoleon Bonaparte, and of Sam whose come and go fortunes also involved the inheritance of his sisters. Adams, John, President U.S.

* Bowen, Catherine Drinker. John Adams and the American Revolution. Little 1950 699p illus $7.50 **92**
s

1 Presidents—U.S. 2 U.S.—History—Revolution—Biography

"Concerned with the first 40 years of Adams' life. The author re-creates the life of the period, the events through which Adams lived and closes with the signing of the Declaration of Independence." Los Angeles. School Libraries

"The author states that her reading and research for this book were directed toward the understanding of Adams' character, and of how it felt to be a citizen of the eighteenth century. She succeeds in conveying that understanding to her readers in this portrait of a passionate and brilliant man, an ardent patriot and astute statesman, who was also Abigail Adams' devoted but frequently exasperating husband. Abigail herself, many others of Adams' intimates, and the prominent figures of the times, are drawn with equal clarity." Booklist

Addams, Jane

j Judson, Clara Ingram. City neighbor; the story of Jane Addams; illus. by Ralph Ray. Scribner 1951 130p illus $2.95 **92**

1 Hull House, Chicago

"Hull House was established by Jane Addams to help immigrant people faced with poverty, ignorance, and neglect in the slum area of Chicago." Reading Ladders

"Mrs. Judson has used Miss Addams' own writings in letters, articles and books, newspapers, magazine articles, reports and other documents; and her own acquaintance with Miss Addams. [This biography] is told in fiction form with conversation because as the author says 'it seems to make her story more vivid. . . . But nothing herein is fiction in the sense that an incident is imagined.'" Wis Lib Bul

Addams, Jane—*Continued*

‡ Wise, Winifred E. Jane Addams of Hull-House; a biography. Harcourt 1935 255p illus $3.75 **92**

1 Hull House, Chicago

"The material for this biography has been drawn from Miss Addams's published books, her papers, and letters. The author has built up a simple, direct account of Jane Addams's early life and school days, her work at Hull House and her championship of various social and humanitarian causes." Booklist

"There is in Miss Wise's book only just enough of the long struggle, the constantly recurring misunderstandings that met Jane Addams, the successive adjustments of the public mind regarding her, to prepare a young reader for books that will tell him how many other things Jane Addams was called besides 'America's Joan of Arc' in her long working life. This spirit makes the story a book for youth." Books

Agassiz, Louis

Peare, Catherine O. A scientist of two worlds: Louis Agassiz. Lippincott 1958 188p front $3 **92**

1 Naturalists

The author "has dramatized the personality and achievements of Louis Agassiz in a fictionized study for teen-age readers. She pictures the Swiss-born scientist's boyhood fascination with the mysteries of nature, explains the theories he developed through his work on fossil fishes and glaciation as a student and teacher in Europe, and records his contributions to the study of natural history in America." Simon, Charlie May. The sun and the birch; the story of Crown Prince Akihito and Crown Princess Michiko; chapter headings by Grisha. Illus. with photographs. Dutton 1960 192p illus $3.50 **92**

1 Japan—Social life and customs 2 Michiko, consort of Akihito, Crown Prince of Japan

"This biography of the Crown Prince Akihito and Crown Princess Michiko will interest the American young adult. It traces the early years and backgrounds of the prince and princess and shows the two young people devoted to the traditions of their parents and yet realizing they must face the changes that have come about in Japan's civilization and culture. Author has a delightful style, and the illustrations throughout the book tend to keep the Japanese flavor." Library J

‡ Vining, Elizabeth Gray. Windows for the Crown Prince. Lippincott 1952 320p illus $6 **92**

1 Japan—Social life and customs

The record of the author's four years at the Japanese Imperial Court, where she helped to teach and guide the young Prince from a chubby child to a poised, attractive youth with a high sense of responsibility

"The author brings to the reader a real understanding of and liking for Japan and the Japanese people that should help develop a similar liking and appreciation in American young people." Chicago Children's Book Center

Alcott, Louisa May

‡ Meigs, Cornelia Lynde. Invincible Louisa. Little 1933 260p illus $3.75 **92**

1 Authors, American

At head of title: The story of the author of Little women

"Louisa May Alcott and Cornelia Meigs are an ideal combination. Cornelia Meigs is herself the author of excellent and well-loved books for young people; in their pages the reader finds the same integrity that characterizes Louisa Alcott's writing. Back of each author's work one senses a certain fine reserve and dignity and Miss Meigs's books, like those of the earlier writer, have a very definite American quality." A. T. 1 Kings and rulers

"John Gunther skips an eon or two to tell the story of the first of the world's great conquerors—whose exploits will interest young people today. From his boyhood days as the son of Philip, King of Macedon, to his death in Asia and the breakup of his empire, Alexander led a life filled with excitement and danger. A man of great strength and ability, he had one fatal weakness which this biography, to its credit, does not overlook." N Y Times Bk R

Goss, Madeleine. Beethoven, master musician; illus. by Carl Schultheiss. [Rev. ed] Holt 1946 364p illus music $3.50 **92**

1 Composers

First published 1931 by Doubleday

"Using the standard biographies as sources the author has skillfully emphasized the facts and events most interesting to youthful readers. Boys and girls will find in this volume a Beethoven who is alive and very human. No small part of the value of the book lies in the picture it gives of musical circles in the late eighteenth and early nineteenth centuries. Beethoven seems real because the background is so well filled in and because his friends and patrons appear as personalities, not as mere names." N Y Times Bk R

1 Conductors (Music)

"The author outlines Bernstein's considerable artistic achievements and attempts to convey the flavor and significance of his music. Bernstein himself remains an exuberant, irritating, ingratiating enigma, however. Style is journalistic and adulatory but maintains professional competence. One wonders why it is 'a biography for young people,' since it is not, remarkably different from the author's other adult books which aim to popularize music. Could be useful to meet teen-age interests in music or current biography, but would be superseded by a deeper or more perceptive portrait. Appendix includes musical works, discography, and bibliography." Library J

Awarded the Newbery Medal, 1956

At the age of twelve Nathaniel Bowditch was apprenticed to a ship chandler in Salem. After working all day he spent his nights learning all he could about ships and the sea, and about mathematics and astronomy. The result was that when he later went to sea he proved himself an able navigator. Before he was thirty he wrote "The American practical navigator," the book that has become the standard text on navigation

1 Painters, Italian 2 Scientists

This biography of Leonardo da Vinci, set against the background of Renaissance Italy, tells of his creative work as inventor, artist and scientist struggling against the ignorance of his time. He tried to invent a flying machine, a diving suit and a submarine; he painted such great pictures as "The Last Supper" and "Mona Lisa"; and he left notebooks showing his scientific studies in light and sound. (Publisher)

"With the boy reader in mind, stress is laid on Leonardo's interest in science and engineering, but the broad scope of the man's genius is not in any sense minimized nor are his masterpieces in art less appreciatively handled. As with others of the series, the appeal will be to the more experienced reader than the earlier 'Landmark' volumes." Library J

* I walked with heroes; illus. with photographs. Holt 1961 342p illus $5 **92**

1 Philippine Islands 2 Statesmen

"The bubbling autobiography of a 'small man from a small country' (as he calls himself) who helped his own Philippines win independence and, later, in the United Nations spoke for other aspiring small countries. A boy prodigy who was a successful journalist in his teens, Romulo recalls also his years as teacher, soldier, and diplomat. This is less straight adventure than discussion of his political and diplomatic experiences. His background and personal life come into it but it is primarily a reassessment of men and issues of the past with a restatement of his belief in the need for 'one world.' Since Romulo has taken active part in recent history, his book throws light on Philippine leaders, UN debates, and current world problems. Through it all shines the integrity of Romulo's character." He tells of his family and friends, school days and holidays, of his first jobs, his later travels about the country in search of work, and finally of his experiences in the Spanish American War

These chapters "are those most descriptive of Sandburg's boyhood and youth; together they form the story of his development. Told in poetic but clear and vigorous manner, they reveal his Swedish parents, his little village, his neighbors, his many jobs, his restless desire to see more and know more, his first momentous contacts with the Lincoln legend which became so much a part of his own life and works. Brilliant, arrogant, and dedicated, Schliemann amassed a fortune . . . [and] devoted himself from 1870-1890 to planning and superintending excavations. . . . Well-documented; time-chart, bibliography and index are appended. "A genial biography of Sir Walter Scott, which takes as its theme the parallels between Sir Walter, a Napoleon of letters, and his contemporary, Napoleon Bonaparte. The biographer does not begrudge Sir Walter the benevolence and sweetness that earned for him the idolatry of his family, dogs, friends, and servants. But he points out that Sir Walter also enjoyed a drink and a bawdy joke with the boys as much as the next man. He has thus made Sir Walter Scott into a three-dimensional figure in whom lurked the dual spirit of Sancho Panza and Don Quixote." Booklist

1 Presidents—U.S. 2 U.S.—Politics and government—1945-

Contents: v 1 Year of decisions; v2 Years of trial and hope

A "record of the former President's tumultuous years in office, his early days in Missouri . . . glimpses of his family life, appraisals of world leaders, and . . . about the background of national and international events." Publisher's note

"Perhaps the cardinal value of the book indeed, lies in its frank depiction of Mr. Truman's mind and character. As a literary performance it does not achieve a place among the best memoirs of our times. . . . Nevertheless, this is a volume of distinction. It has force, clarity and sincerity. It contains numerous comments of incisive shrewdness and anecdotes both apt and revealing. It is lighted up by bit of informal, folksy writing." B O M News

1 Great Britain—History—19th century 2 Queens

"It is very much as a novelist that Mr. Strachey deals with the characters in his book: Lord Melbourne, Lord Palmerston, Gladstone, Disraeli and many another. The Prince consort and the Queen herself are, of course, the hero and heroine, and it is really as such that they emerge from the author's fundamentally humorous yet fundamentally sympathetic analysis of their characters and lives." 1 Great Britain—History—19th century 2 Queens

"The life of the Queen is portrayed with affection and competence. The author has so described the long reign of Victoria that she emerges as a very real person. The greatest merit of the book is, however, that without inundating the reader in a flood of names and dates, the historical background and the life of the royal family are presented in just enough detail to enable the reader to understand the cause-and-effect relationship between a sovereign and the events that take place during her reign." Integrated with the text are photographs of many of the medieval castles of Europe as they stand today and diagrams of their original structure. The Middle Ages live again as the author describes the weapons and techniques of warfare in that period, what feudalism was, the roles of great Kings and nobles, and the vital part played by the castles. (Publisher)

"An accurate and careful study of castles from the first 'motte-and bailey' built by William the Conqueror to the gradual disuse of the battlemented buildings. . . . An excellent book for either school or public library." Massachusetts

The crusaders. Putnam 1959 96p illus $3 **940.1**

1 Crusades

"A book that concentrates on the First Crusade at the close of the eleventh century. The author discusses the background of European feudal structure and the motivations of the Crusaders, describing the four armies that marched to Jerusalem and telling in detail the battles of Nicaea, Antioch, and Jerusalem. The last fifteen pages of the book survey briefly other Crusades, especially the ill-fated Children's Crusade. Mr. Buehr is candid in his description of the behavior of the marchers, which was not always exemplary. The emphasis on only one of the Crusades limits the value of the book and the omission of a map is regrettable." Chicago Children's Book Center

"The book describes a typical medieval seigneury in northern France in the year 1220, which represents the epoch when the spirit of the Middle Ages had reached its full development. Descriptions are given of the castle itself and the household of the seigneur, its customs and hospitality, the training of knights and nobles, tourneys and feudal battles. An account of the peasant villages roundabout is included, also of the abbey and monastery, and the cathedral seat of the bishop." Book Rev Digest

1 Middle Ages

"The aim of this book has been to tell the story of the Middle Ages in such a way as to bring out most characteristic features of the period and to emphasize those things in medieval life which have most significance for us today." Preface

"Covers, roughly, the period between 300 and 1500, with discussions of the church, Charlemagne, the Norsemen, monasteries, chivalry, the crusader, medieval town, trade, and travel, education, and government

"The author's informal, intimate style of history writing which she maintains without ever seeming to 'write down' to the pupil, the frequent use of quotations from contemporary chronicles, the amount of space given over to a discussion of the civilization of the period, and the fine illustrations, make this . . . a real contribution to the history collection." "A sabotage mission to Norway in 1943 was a gamble that failed but it proved the almost incredible stamina of the one man who survived. When the crew of the disguised fishing vessel and his three Commando partners were all killed by Nazis on the Arctic Norwegian coast, Jan Baalsrud fled into the snowy wastes. Although he was aided by various countrymen at the risk of their own lives, he reached Sweden only after such ordeals as being buried in an avalanche, wandering senseless and frozen for days, lying in a snow cave for a month, almost dying of frost bite. It is a grim record which highlights courage and does not play up the horrible sufferings." Horn Bk

Stuart, Dorothy M.—*Continued*

"A history of London that contains much interesting material, but demands of the reader more knowledge of English history than most children in the United States have. The author often discusses only those aspects of an event or period that concerned London so that the reader does not see the total picture. In addition, sequence is hard to follow because events are telescoped—or because the connection between events is not clarified. For classroom use, the lack of indexing, maps, or chronological chart severely limits the value of the book." Chicago. Children's Book Center

1 Hungary—History—Revolution, 1956
2 Refugees, Hungarian

"The bridge was a shaky wooden structure between Austria and Hungary. Across it in November 1956, thousands of Hungarians fled from Russian retaliation for their October revolt. Here Michener interviewed students, workers, intellectuals, ordinary citizens to find out what had happened and why. His book, written at white heat, describes the spontaneous uprising against Russian domination, the courage of a people who pushed back Russian tanks and soldiers with little more than bare hands, the return of the Russians to raze Budapest and exterminate the rebels. He has included many stories of individual bravery as well as some gruesome accounts of Russian torture of prisoners. Most amazing is the fact that so many of those who sparked the uprising were the young students and workers who had known nothing but communism and had been given preferred treatment under it. Beside his salute to Hungarian gallantry and his sorrow that Hungary is not yet free, Michener puts his regret that America could not have done more to help and his conviction that Russia's control of her satellites is broken forever. This is rambling and somewhat confused but it is immediate in reporting and appeal. It is one more testimonial to mankind's innate desire for freedom." Horn Bk

(ed.) France in crisis. Wilson, H.W. 1957 208p (The Reference shelf v29, no.2) boards $2 **944.082**

1 France—Foreign relations 2 France—Politics and government—1945-

"The purpose of this book is to set forth representative current views on the present political situation of France, in the light of the more important developments since the end of World War II. For a fuller background on French affairs, the books listed in the bibliography at the end of this volume should be consulted." Preface

Loder, Dorothy
The land and people of Spain; illus. from photographs. Lippincott 1955 117p illus map (Portraits of the nations ser) $2.95 **946**

1 Spain—Description and travel 2 Spain—History

"History of the country fills nearly two-thirds of the volume with absorbing discussion of conquests and influences, church and political conflicts, as it moves from Romans, Visigoths, Moors and Saracens, to Napoleon and modern factions. . . . The last portion of the book describes, in guidebook fashion, important places to visit, with less space than usual in this series devoted to life and activities of the people today and to the country's natural resources, commerce and industry." Horn Bk

"An especially interesting aspect of the account is the introduction of outstanding writers and artists, with a discussion of how their work reflects the section of the country in which each lived or the temper of the times in which each one worked." Chicago. Children's Book Center

Nazaroff, Alexander
* The land of the Russian people. [Rev. ed] Lippincott 1960 164p illus maps $2.95 **947**

1 Russia—Description and travel 2 Russia—History

First published 1944

A survey of Russia's history from the earliest times through rule by the czars and emperors to the present Soviets. Describes also the country's vast and varied terrain, including Siberia, Moscow, Leningrad and western Russia

Seeger, Elizabeth
The pageant of Russian history; decorations and maps by Bernard Watkins and Erik Magons. Longmans 1950 433p illus maps $6.50 **947**

1 Russia—History

The author has pictured the tremendous panorama of Russian life from the time of the Slavic invasion of Europe through the centuries of chaotic, despotic and sometimes peaceful rule up to the close of World War II. Contemporary Russia stands strangely and newly revealed in the continuous sweep of her past history

Gunther, John
‡ Inside Russia today. Harper 1958 xxiv, 550p maps $6.50 **947.085**

1 Russia—Biography 2 Russia—Civilization 3 Russia—Politics and government—1953-

"The product of [the author's] fourth trip to Soviet Russia, it is a combination of what he saw there and what he has gleaned from printed Russian sources. All phases of Russian life and the Russian economic and political present and future are covered, there is some history and there is a who's who of Russian leaders." Pub W

"Gunther's usual broad readable survey of country, customs, people, and personalities with amazing wealth of detail though with little interpretation or deep understanding. . . . His sharp eye and reportorial training help him select homely, interesting, and illuminating incidents as he sums up history and indicates current trends." Horn Bk

Overstreet, Harry
* The war called peace; Khrushchev's com-
s munism by Harry and Bonaro Overstreet. Norton 1961 368p $4.50 **947.085**

1 Communism—Russia 2 Khrushchev, Nikita Sergeevich

"The conviction grows among us that the free world today faces an issue of moral and spiritual survival it has never faced before. 'Communist man' confronts 'the free man' . . . . [Khrushchev] more than anyone else has made us see the complete irreconcilability of these two patterns of man; and in doing so, he has helped us to know where our loyalties and our efforts must lie. This book is an attempt to explore what Khrushchev reveals." Foreword

"The work draws on the authors' interviews with refugees from communist countries and on a wide selection of communist and non-communist writings." Booklist

949.3 Belgium

Loder, Dorothy
* The land and people of Belgium. Lippincott 1957 115p illus map (Portraits of the nations ser) $2.95 **949.3**

1 Belgium

"An interesting picture of Belgium. About half the book is devoted to an historical survey, concentrating on the medieval period and emphasizing the struggle for freedom from outside control. The other half describes the various regions of modern Belgium, discussing in particular the differences between Flemish-speaking Flanders in the north and French-speaking Wallonia in the south, and the ways in which the two groups are adjusting to each other after centuries of bickering and hard feeling. There is little space given to contemporary political, economic, and social structure and problems, but the book communicates the traditions and atmosphere of the country." Chicago. 949.5 Greece. Byzantine Empire

Chubb, Thomas Caldecot
The Byzantines; illus. by Richard M. Powers. World Pub. 1959 126p illus map $2.95 **949.5**

1 Byzantine Empire—History

"The story of the power of the Byzantines begins, in this account, with the description of the Crusaders who, in 1203, turned from their route to attack and plunder the Christian city of Constantinople. The author then describes what the Crusaders found, and goes back to the founding of the city by Constantine the Great in 330 A.D. The learning, the technology, the pride and wealth of a civilization that prospered for a thousand years, are made real and exciting by the vivid writing and colorful detail. Absorbing and instructive. A bibliography is appended, also a chronological chart that correlates events in the Byzantine Empire and the rest of the world from 300 A.D. to 1500 A.D." Chicago. Gianakoulis, Theodore
The land and people of Greece; illus. from photographs. Lippincott 1952 117p illus map (Portraits of the nations ser) $2.95 **949.5**

1 Greece—History 2 Greece, Modern—History

"Brief outlines of the physical geography of Greece and the present social, economic, and cultural state of her people are placed against a detailed background of Greek history from earliest to modern times. Although the author has given a seemingly disproportionate amount of his book to Greek history, he has succeeded in conveying to the reader a real understanding of the Greek people of today and the place of Greece in the modern world. Fairly small print and full pages." Chicago. Children's Book Center

Latourette, Kenneth Scott
s A short history of the Far East. 3d ed. Macmillan (N Y) 1957 730p maps $8.50, text ed $6.40 **950**

1 East (Far East)—History

First published 1946. In the 1957 edition "the changes have been a few corrections, chiefly typographical, in the preceding printings, slight modifications in chapter 1 to take account of political shifts of territory, alterations in the bibliographies to utilize the lastest literature, and a fresh chapter to bring the narrative down to date." Preface to the third edition

Designed primarily for Americans, "the purpose of this book is to provide an introduction to the contemporary Far East." Preface [to the first edition]
